Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This action is in response to the amendment filed on February 3rd, 2003.
2. Claims 1-45 remain rejected. For specific rejections of these claims, see the office action filed on October 25th, 2002. (Note: the amendments to Claims 16, 27, 31, and 42 do not change the scope of these claims, and thus the rejections of these claims stand).

RESPONSE TO ARGUMENTS

3. In regard to the U.S.C. 102(e) rejection of Claims 1, 16, and 31, the applicant argues that Angel does not teach, "inserting probes only at...locations in the application" that "would produce non-redundant information." However, this feature cannot just be stated as a characteristic of the system. It must follow as a result of the method steps set forth in the claim. The applicant makes similar arguments for the U.S.C. 102(b) rejection of Claims 1, 16, and 31 as well as the U.S.C. 103(a) rejection of Claims 12, 27, and 42. Again, it is not enough to simply state the feature as a characteristic of the system. It must be shown *how* the system discovers probe points that produce non-redundant information.

Furthermore, the language of Claims 1, 16, and 31 contain the terms "comprising" and "including". These terms indicate that the features mentioned in these claims are simply part of the invention, and that there are other features of the invention that are not claimed. In this way, the art used to reject Claims 1, 16, and 31 (Angel et al. (U.S. Patent Number 6,314,558)) does show inserting probes at locations that do produce non-redundant information. The art also shows inserting probes at all other locations in the program as well. Applicant has not claimed a feature that detects appropriate points that produces non-redundant data.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
